

CALLINEX MINES INC.

Management's Discussion and Analysis for the three months ended December 31, 2015

The information contained in this Management's Discussion and Analysis of Financial Condition and Results of Operations for the three months ended December 31, 2015 ("MD&A") has been prepared as of February 26, 2016. It should be read in conjunction with the audited financial statements of Callinex Mines Inc. for the year ended September 30, 2015.

The referenced financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS"). All amounts are expressed in the Company's presentational currency of Canadian dollars unless otherwise indicated.

CORPORATE SUMMARY

Business description

Callinex Mines Inc. (the "Company" or "Callinex") is principally engaged in the acquisition, exploration and development of mineral properties in the province of Manitoba with its head office located in Vancouver, British Columbia, Canada. The Company is a reporting issuer in British Columbia and Alberta and trades its common shares on the TSX Venture Exchange under the symbol CNX.

Business Strategy

The Company's focus is on carrying out exploration activities at the Pine Bay and Flin Flon Projects, located in the Flin Flon Mining District, Manitoba (MB), for the purpose of identifying high grade copper and zinc rich volcanogenic massive sulphide ("VMS") deposits. The Company believes that there is an opportunity to increase shareholder value by focusing its capital on exploring for VMS deposits with high grade polymetallic characteristics located within well-established mining districts.

Operational Highlights

- Completed a three hole, 3,111m summer drilling campaign, which led to the discovery of a new VMS zone within drill hole SDB001 that intersected 7.4m of 1.58% Cu Eq. including 2.4m of 2.2% Cu Eq.;
- Appointed renowned VMS expert, and PDAC award recipient, James R. Pickell to the Company's Technical Team. Mr. Pickell has over 40 years of experience in base metal exploration within the Flin Flon district that has led to the discovery of four producing mines, including HudBay's nearby 777 Mine; and
- Announced plans to complete a fully-funded drilling campaign in 2016 consisting of approximately 10,000m at the Company's 100% owned Pine Bay Project located near HudBay's 777 mine and processing facilities in Flin Flon, Manitoba.

QUARTERLY INFORMATION

The following is selected financial data from the Company's unaudited quarterly financial statements for the last eight quarters ending with the most recently completed quarter, being the three months ended December 31, 2015.

	December 31 2015 (\$)	September 30 2015 (\$)	June 30 2015 (\$)	March 31 2015 (\$)
Three months ended				
Revenues	-	-	-	-
Net Loss	(410,251)	(3,520,954)	(256,397)	(316,826)
Loss per share (basic and diluted)	(0.01)	(0.09)	(0.01)	(0.01)

CALLINEX MINES INC.

Management's Discussion and Analysis for the three months ended December 31, 2015

	December 31 2014 (\$)	September 30 2014 (\$)	June 30 2014 (\$)	March 31 2014 (\$)
Three months ended				
Revenues	-	-	-	-
Net Loss	(295,786)	(16,024,458)	(456,754)	(353,678)
Loss per share (basic and diluted)	(0.01)	(0.51)	(0.01)	(0.01)

(1) The basic and diluted loss per share calculation results in the same amount due to the anti-dilutive effect of outstanding stock options and warrants.

The net loss for the quarter ended September 30, 2015 and 2014 was higher due to \$3,536,375 and \$21,525,857 of exploration and evaluation assets written down or impaired and \$418,306 and \$5,850,000 of deferred tax recovery recorded in the quarters, respectively.

RESULTS OF OPERATIONS

During the three months ended December 31, 2015, the Company reported a net loss of \$410,251 (2014 - \$295,786 or \$0.01 loss per share). Operating activities consumed \$239,332. Cash requirements for investing activities totaled \$588,772 which solely related to exploration and evaluation asset expenditures. These cash requirements were primarily funded from private placements completed during the previous year.

	2015 (\$)	2014 (\$)
General and administrative expenses	(299,507)	(184,595)
Share-based payments	(110,787)	(114,090)
Interest earned	43	2,899
Net loss for the year	(410,251)	(295,786)

With respect to general and administrative expenses, the 2015 expenditures were consistent with those of 2014 primarily because of the Company's concerted effort to reduce overhead corporate costs in the prior years. The most significant general and administrative expenses were with respect to the following:

Salaries - \$92,715 (2014 - \$54,184)

Salaries include fees paid to the Company's senior executives and employees. The increase represents an increase in the number of employees from the prior year.

Office administration and corporate development - \$57,060 (2014 - \$21,230)

The increase is largely a result of increased corporate development activities due to the Company's increased activity level over the comparable period.

Shareholder engagements - \$80,677 (2014 - \$31,782)

The increase is largely a result of increased shareholder marketing functions associated with capital raising efforts during the period.

Share-based payments expense of \$110,787 (2014 - \$114,090) was recorded during the period based on newly granted options and vesting terms of options granted.

Capital Expenditures

During the three months ended December 31, 2015, the Company incurred deferred exploration expenditures of \$152,059 (2014 - \$41,112). The majority of the expenditures relate to the Pine Bay property.

CALLINEX MINES INC.

Management's Discussion and Analysis for the three months ended December 31, 2015

Financing Activities

There were no financing activities during the three months ended December 31, 2015 and 2014.

LIQUIDITY AND CAPITAL RESOURCES

As at December 31, 2015, the Company had cash on hand of \$2,835,399 compared to \$3,663,503 as at September 30, 2015. The net decrease of cash for the period, is due primarily to cash used in operating activities of \$239,332 and capital expenditures of \$588,772.

As at December 31, 2015 the Company had working capital of \$2,986,149 (September 30, 2015 - \$3,435,548) and no long term debt.

EXPLORATION PROGRAMS AND EXPENDITURES

During the period ended December 31, 2015, the Company incurred deferred exploration expenditures of \$152,059 (2014 - \$41,112). The majority of the expenditures related to the Pine Bay exploration programs.

The following are the significant exploration and evaluation assets held by the Company:

Pine Bay

Callinex owns a 100% interest, subject to a 1% Net Smelter Return ("NSR") royalty and a 5.12% Net Profits Interest, in the Pine Bay Project. The project is located 16km east of Flin Flon, MB and covers approximately 6,000ha. The project includes a mineral lease that allows for the right to operate a mine and covers a 212m vertical shaft with 760m of underground development accessing high-grade copper mineralization. Additionally, the project hosts four past producing VMS mines and historic resources. The Company completed 8 holes totaling 4,536m during the 2015 calendar year and approximately 80km of ground geophysics.

Flin Flon

Callinex owns a 100% interest, subject to a 2% NSR royalty of which 1% of the NSR royalty may be purchased for \$1,000,000, in the Flin Flon Project. The project is located 3 km southeast of Flin Flon, MB and covers 2,455 ha with similar geological strata to the main mine horizon that hosts Hudbay's 777 mine. The Project was acquired based on the presence of these favourable geological strata, known mineral occurrences and close proximity to more than ten former producing VMS mines. Recent geophysical work completed in 2012 and 2013 identified several prospective targets.

Gossan

Callinex owns a 100% interest, subject to a 2% NSR royalty, in the Gossan Gold Project. The project is located 40km southeast of Flin Flon, MB and covers approximately 7,428ha. The project includes a past-producing gold mine with significant unmined gold mineralization. From 2010-2012 the Company completed a 63 core drill hole program resulting in the delineation of gold mineralization over a 1.8 kilometer strike length.

Island Lake

Callinex has an option to acquire a 80% interest, subject to a 2% NSR royalty, in the Island Lake Gold Project. The project is located east-central Manitoba approximately 220km from Norway House, MB and covers approximately 5,471ha. The project is situated adjacent to the closed Island Lake Mine and includes gold showings over a strike length of more than 1,600m. Previous exploration has identified significant high-grade occurrences of gold. Cumulative payments of \$330,000 cash and 275,000 shares, along with work commitments of \$2,000,000, are required within 36 months of July 31, 2009 in order for Callinex to complete its option agreement to acquire an 80% interest. The dates to make the property payment and to incur exploration expenditures on

CALLINEX MINES INC.

Management's Discussion and Analysis for the three months ended December 31, 2015

the claim have been deferred as the Company has not received a permit to commence exploration drilling on the property.

Neuron

Callinex owns a 100% interest in the Neuron Project. The project is located near Thompson, MB and covers 75,762ha. Callinex completed a 12-hole program in 2014 and identified high-grade graphite mineralization along a significant strike length. Additionally, preliminary metallurgical work completed by SGS Labs determined graphite is comprised of coarse flakes which is typically more desirable by consumers.

Herblet Lake

Callinex owns a 100% interest, subject to a 2.5% NSR royalty, in the Herblet Lake Project. The 2,441 ha project is located in the Snow Lake mining district and hosts similar geological structures to the nearby Osborne and Anderson mines.

Sneath Lake

Callinex owns a 100% interest in the Sneath Lake Project. The 1,431 ha project is located in the Snow Lake mining district and is approximately 5km from Hudbay's Lalor Mine.

Coles Creek

Callinex owns a 100% interest, subject to a 5% NSR royalty, in the Coles Creek Project. The project is located 80 km southwest of Houston, British Columbia and covers 14,895ha. Previously exploration drill core drilling programs identified copper-gold-molybdenum mineralization over a significant area.

Fox River

The Company owns an approximate 45% interest, subject to a 2.5% NSR royalty, in the Fox River Project. The project is located in northeast Manitoba and covers 3,792ha. The project covers an area that has potential to be an extension of the world class Thompson Nickel Belt.

RELATED PARTY TRANSACTIONS

The Company's related parties consist of the Company's directors, officers and companies associated with them including the following:

- NiconsultGMBH, a company owned by Nico Civelli, VP Finance and Director
- Terra Nova Energy, a company which Nico Civelli, VP Finance and Director is an Officer and Director

Compensation paid or payable to the Company's Board of Directors and corporate officers for services provided during the three months ended December 31, 2015 and 2014 was as follows:

	2015	2014
	\$	\$
Accounting	4,371	6,952
Consulting ⁽¹⁾	19,500	16,500
Salaries	45,500	30,000
Share-based compensation	57,936	69,901

CALLINEX MINES INC.

Management's Discussion and Analysis for the three months ended December 31, 2015

During the three months ended December 31, 2015 and 2014, the Company incurred the following additional related party expenditures:

	2015	2014
	\$	\$
Office and administration ⁽²⁾	-	(9,000)

⁽¹⁾ On August 1, 2014 the Company entered into an agreement with Niconsult GMBH for Nico Civelli to provide VP of Finance services.

⁽²⁾ On June 1, 2014 the Company entered into an office facilities and service agreement with Terra Nova Energy Ltd ("Terra Nova") whereby the Company will provide certain shared office services to Terra Nova.

As of December 31, 2015 a total of \$3,000 (September 30, 2015 - \$3,000) from related parties is included in accounts receivables in relation to the Terra Nova agreement and \$6,500 (September 30, 2015 - \$9,572) was owed to related parties (Isaac Max Porterfield, Chief Executive Officer) and is included in accounts payable and accrued liabilities.

FUTURE ACCOUNTING STANDARDS AND PRONOUNCEMENTS

At the date of approval of the financial statements the following standards, which are applicable to the Company, were issued but not yet effective. The Company has not completed its assessment of the impact that the new and amended standard will have on its financial statements. The following is a brief summary of the principal new or amended standards:

IFRS 9 - Financial instruments

In July 2014, the IASB issued the final version of IFRS 9 – Financial Instruments – to replace IAS 39 – Financial Instruments: Recognition and Measurement. The standard is effective for annual periods beginning on or after January 1, 2018, with early adoption permitted.

OFF BALANCE SHEET ARRANGEMENTS

The Company has no off-balance sheet arrangements.

SUBSEQUENT EVENTS

- Callinex commenced a 12-hole, 7,300m winter drilling campaign with two drill rigs at the Pine Bay Project with the objective to identify additional high-grade VMS mineralization rich in copper, zinc, gold and silver; and
- Announced the discovery of a new VMS zone with significant chalcopyrite mineralization, a copper-bearing mineral, over a four-meter width at a vertical depth of 313m and a subsequent zone with sphalerite stringers, a zinc-bearing mineral.

CALLINEX MINES INC.

Management's Discussion and Analysis for the three months ended December 31, 2015

OUTSTANDING SHARE DATA AND DILUTION CALCULATION

The Company has authorized share capital consisting of common shares without par value. The number of shares authorized is unlimited. The Company has issued warrants for the purchase of common shares and also a stock option plan. The table below summarizes the Company's common shares and stock options and warrants that are convertible into common shares:

Issued and outstanding common shares	47,654,472
Share options with a weighted average exercise price of \$0.34	4,595,000
Share purchase warrants with a weighted average exercise price of \$0.44	2,812,918
Fully Diluted	55,062,390

RISKS AND UNCERTAINTIES

Natural resources exploration, development, production and processing involve a number of business risks, some of which are beyond the Company's control. These can be categorized as operational, financial and regulatory risks.

Operational risks include finding and developing reserves economically, marketing production and services, product deliverability uncertainties, changing governmental law and regulation, First Nations consultation, hiring and retaining skilled employees and contractors and conducting operations in a cost effective and safe manner. The Company continuously monitors and responds to changes in these factors and adheres to all regulations governing its operations. Insurance may be maintained at levels consistent with prudent industry practices to minimize risks, but the Company is not fully insured against all risks, nor are all such risks insurable.

Financial risks include commodity prices and interest rates all of which are beyond the Company's control. Additional financial risks are the Company's ability to raise capital and to repay indebtedness it incurs.

Regulatory risks include the possible delays in getting regulatory approval to the transactions that the Board of Directors believe to be in the best interest of the Company, and include increased fees for filings, the introduction of ever more complex reporting requirements the cost of which the Company must meet in order to maintain its exchange listing.

DISCLOSURE CONTROLS AND PROCEDURES

In connection with National Instrument 52-109 (Certificate of Disclosure in Issuer's Annual and Interim Filings) ("NI 52-109"), the Chief Executive Officer and Chief Financial Officer of the Company have filed a Venture Issuer Basic Certificate with respect to the financial information contained in the condensed interim financial statements for the three months ended December 31, 2015 and this accompanying MD&A (together, the "Filings").

In contrast to the full certificate under NI 52-109, the Venture Issuer Basic Certificate does not include representations relating to the establishment and maintenance of disclosure controls and procedures and internal control over financial reporting, as defined in NI 52-109. For further information the reader should refer to the Venture Issuer Basic Certificates filed by the Company with its filings on SEDAR at www.sedar.com.

FORWARD LOOKING STATEMENTS

Certain of the statements made herein may constitute "forward-looking statements" or contain "forward-looking information" within the meaning of applicable Canadian securities laws. In this context, forward-looking statements often address expected future business and financial

CALLINEX MINES INC.

Management's Discussion and Analysis for the three months ended December 31, 2015

performance, and often contain words such as "anticipate", "believe", "plan", "estimate", "expect", and "intend", statements that an action or event "may", "might", "could", "should", or "will" be taken or occur, or other similar expressions. All statements, other than statements of historical fact, included herein including, without limitation; statements about the potential for additional mineralization at the Company's properties, the timelines to complete the Company's exploration programs, timing for permit applications, timing for new resource estimates, timing to complete technical reports, forecasts for exploration expenditures, estimates of future administrative costs and statements about the Company's future development of its properties. Forward-looking statements are subject to a variety of risks and uncertainties which could cause actual events or results to differ from those reflected in the forward-looking statements, including, without limitation, risks and uncertainties relating to foreign currency fluctuations; risks inherent in mine exploration and development including environmental hazards, industrial accidents, unusual or unexpected geological formations, ground control problems and flooding; risks associated with the estimation of mineral resources and reserves and the geology, grade and continuity of mineral deposits; the possibility that future exploration, development or mining results will not be consistent with the Company's expectations; the potential for and effects of labour disputes or other unanticipated difficulties with or shortages of labour or interruptions in production; the potential for unexpected costs and expenses and commodity price; uncertain political and economic environments; changes in laws or policies, delays or the inability to obtain necessary governmental permits; and other risks and uncertainties, including those described under Risk Factors Relating to the Company's Business in the MD&A.

Forward-looking information is in addition based on various assumptions including, without limitation, the expectations and beliefs of management, the assumed long term price of commodities; that the Company can access financing, appropriate equipment and sufficient labour and that the political environment will continue to support the development and operation of mining projects. Should one or more of these risks and uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those described in forward-looking statements. Accordingly, readers are advised not to place undue reliance on forward-looking statements. The Company does not intend to update forward-looking statements or information, except as may be required by applicable law.
